

Rusting Pennies

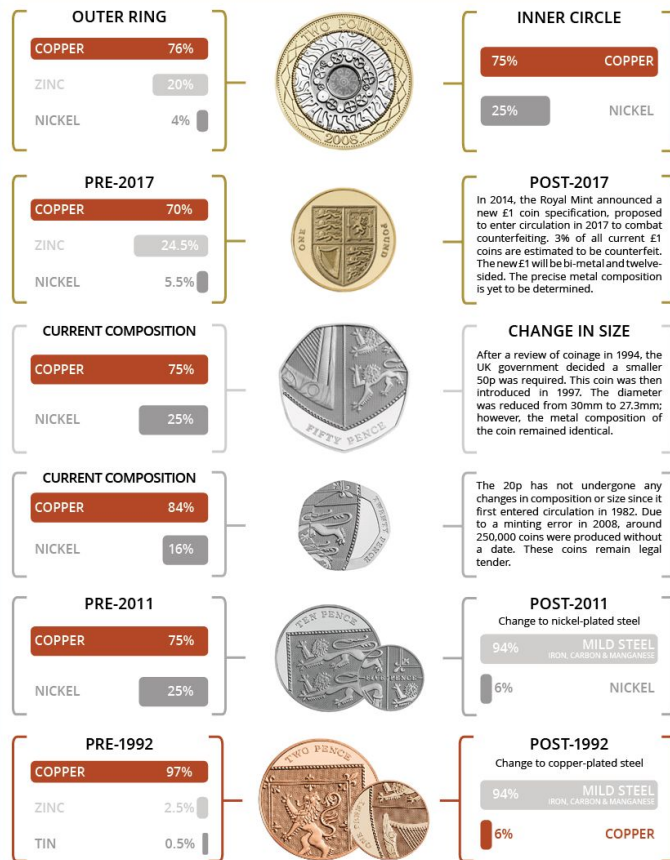

Rusting Pennies

Materials

COMPOSITIONS OF UK COINS

The 20p coins have the most copper?

Rusting Pennies

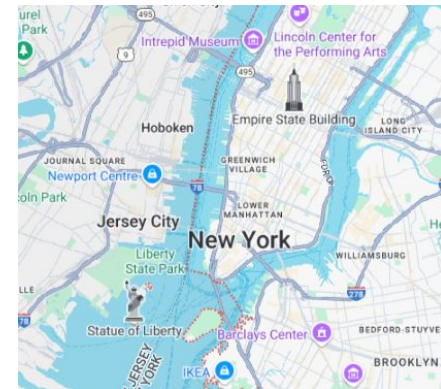

Method

1. Place a few pennies in a plastic cup/bowl.
2. Pour **white vinegar** to **cover** the pennies.
3. Add a **pinch** of **table salt** to the vinegar, stir gently.
4. Let the pennies **soak** in the vinegar-salt solution for 5-10 minutes.
5. Use a small brush or toothbrush to scrub the pennies **gently**.
6. Remove the pennies and place them on paper towels.
7. Allow the pennies to **air-dry**.
8. Observe and compare the colour changes on the pennies. Come back to see the pennies at the end of the day:)

Materials:

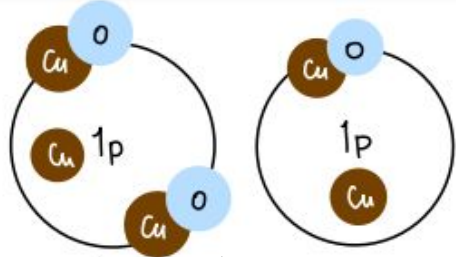

- Copper pennies.
- White vinegar.
- Table salt.
- Paper towels.
- Plastic cups or bowls.
- Brush.

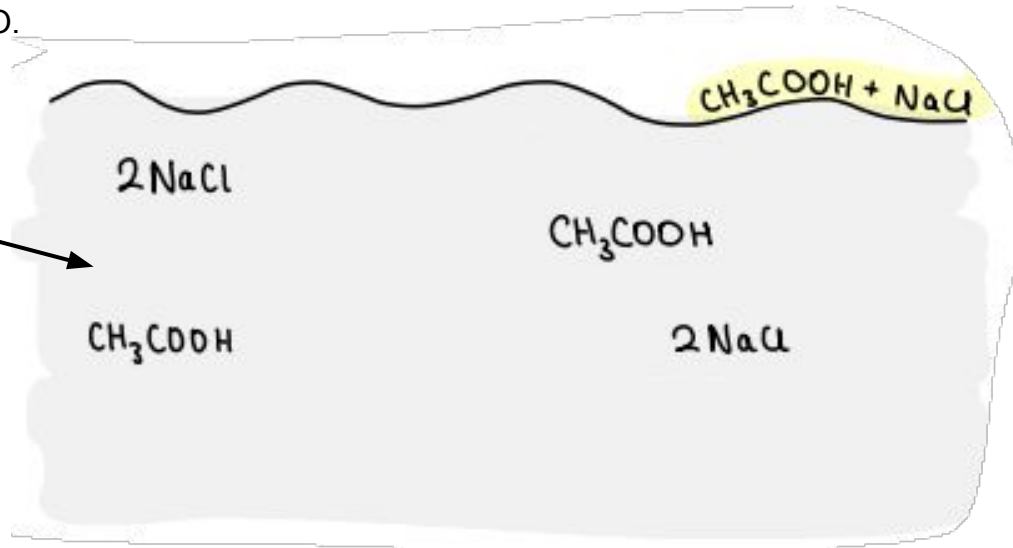

Why does the copper turn **green**?
Have you seen this anywhere else?

Rusting Pennies

How does it work?

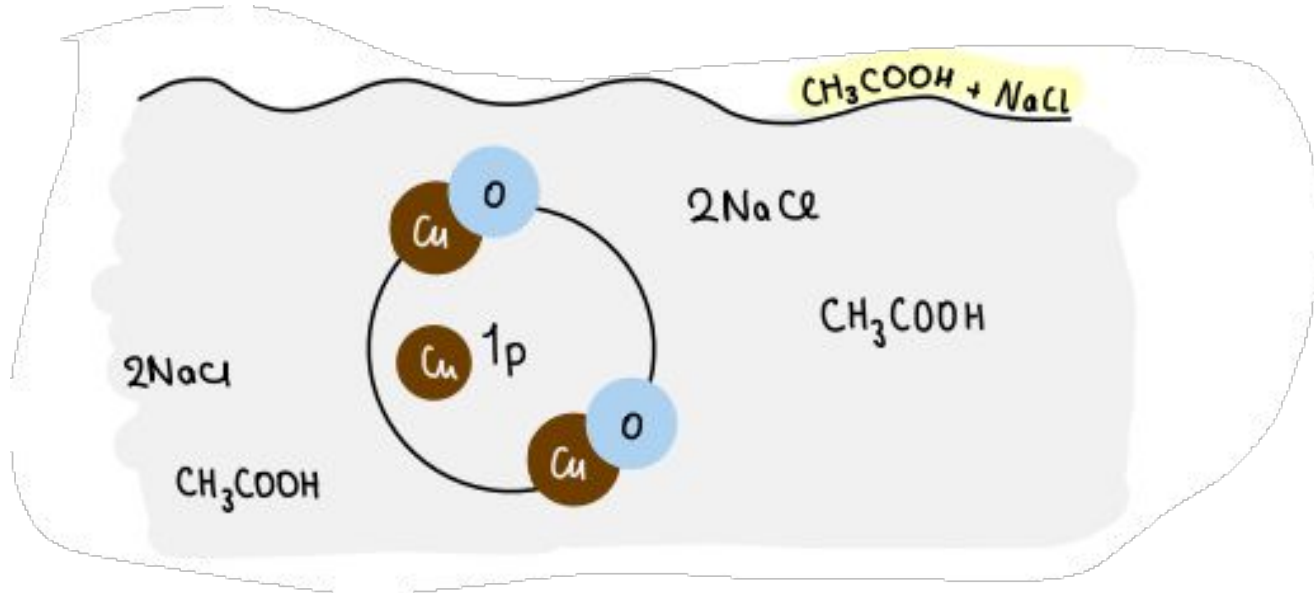

The Cu pennies are coated in CuO .

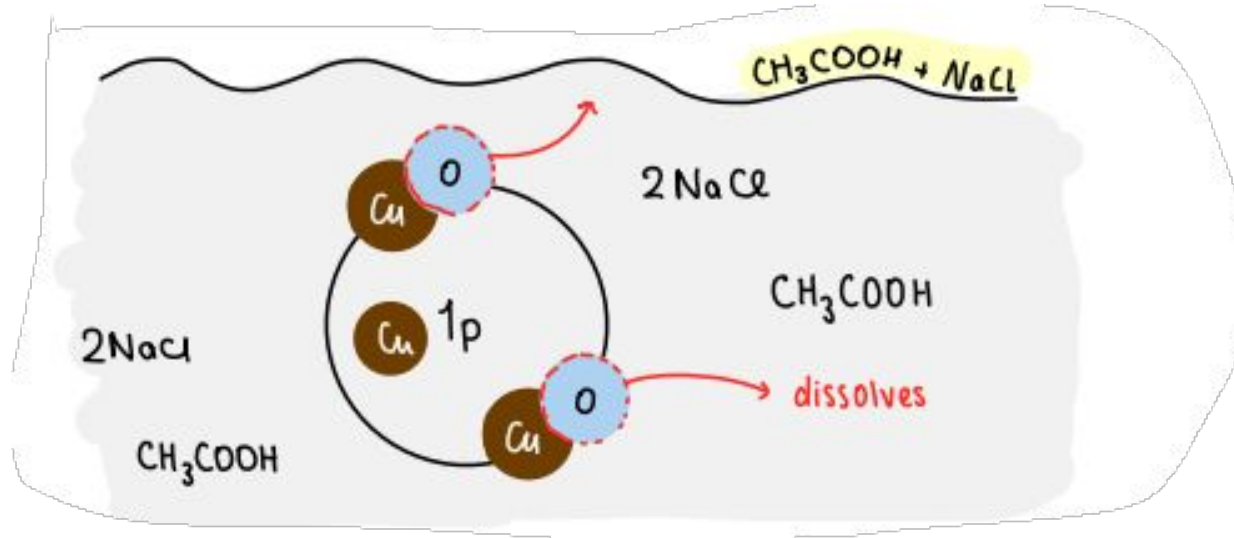

Rusting Pennies

How does it work?

Rusting Pennies

How does it work?

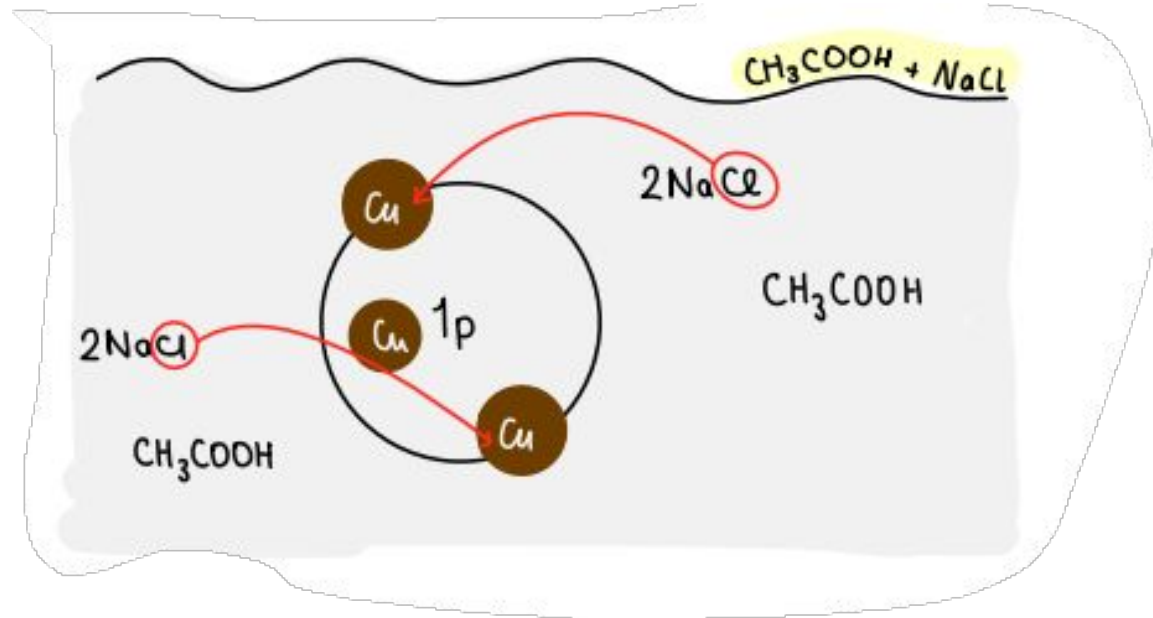

Rusting Pennies

How does it work?

Oxygen leaves the copper atoms.

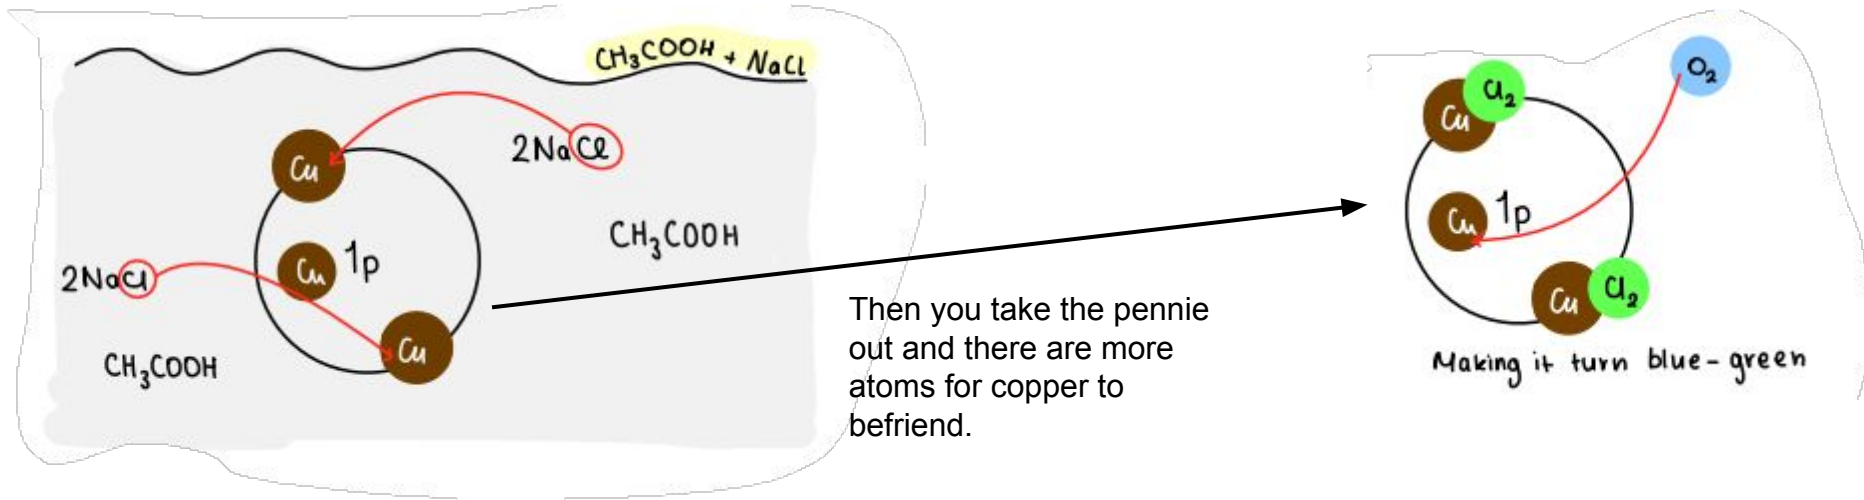

But the copper atoms don't want to be lonely.

So now they bind more easily to incoming atoms.

Rusting Pennies
